VMS INDOOR

Variable Message Sign LED DISPLAY

NEW Product Pink Color

NEW Product WHITE RED PINK

Indoor 3 colors Variable Message Sign (white, red, pink) is the new version of electronic media for information messaging, public relation and advertising. It can be displayed as text, picture, and logo with various formats for example left to right moving, blinking, falling rain, temperature display and build-in clock. The inside memory will allow the virtualization of exact time and date.

- The Variable Message Sign has 50 animated Gif images in its memory which can be introduced to promotion and information messaging. Besides the practical graphic, it also allows creating new images and animation effects.

- Perfect for both government sector and private organizations for example hospital, district offices school, shopping mall, hotel and others.

ISO 9001 : 2000 certification
